POE Web Project Documentation

1. Project Overview

The **POE** project is a static HTML website made up of five primary pages. Its purpose is to provide a simple interface for displaying company information, product details, contact options, and a user enquiry form.

Main Pages

- **`index.html`** — Homepage introducing the company or service.

- **`aboutus.html`** — Contains information about the organization or business.

- **`contactus.html`** — Provides contact methods like phone, email, and address.

- **`enquiry.html`** — A form for visitors to send messages or requests.

- **`products.html`** — Lists or showcases available products.

---

2. Page Descriptions

`index.html`

- Acts as the main landing page.

- Likely includes welcome text, company name, and navigation.

`aboutus.html`

- Shares details about the team, values, or history.

- Often used to build trust with visitors.

`contactus.html`

- Displays contact information.

- May include layout features like sections or tables.

`enquiry.html`

- Provides a user input form.

- Fields typically include:

  - Name

  - Email

  - Phone

  - Message

- Ends with a "Submit" button (note: no backend).

`products.html`

- Shows a product catalog or simple product listings.

- May use basic HTML elements like divs, tables, or lists.

---

3. Technical Structure

- ✅ Pure HTML (no JS or backend)

- ✅ Static navigation with `<a>` links

- ✅ Basic inline or internal CSS styling

- ❌ No interactivity or validation

- ❌ No server-side integration

---

4. Recommendations for Improvement

- 🔄 Add a shared navigation bar across all pages

- 🎨 Use a consistent external CSS file

- ✅ Implement form validation for user input

- 🧩 Use semantic HTML for accessibility

- 🌐 Connect the form to a backend or email service

- 📱 Improve mobile responsiveness with media queries
